

SPECIALTY

Germinex Talc TG

Germination Enhancer

BENEFITS:

ECONOMICAL INVESTMENT FOR SEED

ENHANCED GERMINATION

EASY DIVOT MIX ADDITIVE

EARLY ROOT DEVELOPMENT

IMPROVED VIGOR UNDER STRESS

STAND UNIFORMITY

STRESS TOLERANCE

The lubricating talc carrier facilitates application and encourages even distribution of seed, particularly in unfavorable conditions such as high humidity environments.

Germinex Talc TG is a premium quality, easy-to-use seed treatment designed to maximize germination, vigor, and health in fine turfgrasses. It contains naturally derived extracts balanced with essential secondary and micronutrients. The addition of *Germinex Talc TG* greatly improves Pure Live Seed germination and survivability of seedlings through early root development and on to turfgrass establishment. Mix *Germinex Talc TG* with sand and seed for tee divots and driving range tee repair. Mix *Germinex Talc TG* with bentgrass and *Poa trivialis* for winter overseeding or interseeding.

NUTRIENT ANALYSIS

Calcium (Ca)	2.00%
Magnesium (Mg)	0.50%
Boron (B)	0.02%
Copper (Cu)	0.05%
Iron (Fe)	2.00%
Molybdenum (Mo)	0.0005%
Zinc (Zn)	0.25%

Derived from calcium gluconate, magnesium sulfate, boric acid, copper sulfate, ferric nitrate, sodium molybdate, and zinc sulfate.

2 x 2.0 lb (0.9 kg) pails

PROFESSIONAL USE GUIDELINES

APPLICATION:

Distribute the recommended amount of talc evenly over the top of the seed after filling hopper. Mechanically stir in to allow talc to sift down. It may be desirable to pour in approximately 1/3 of seed and then layer on the proportionate amounts of talc and stir in. This will ensure that all seed comes in contact with the talc from beginning to end of the planting operation. Smaller seed requires more vigorous stirring.

RATE OF APPLICATION:

The objective is to get a small amount of talc on each seed. Generally, 8 oz dry measure (by volume) is sufficient for 40-50 lb of seed (0.9 kg for 100 kg of seed). Do not exceed the recommended dosage.

COMPATIBILITY:

Germinex Talc TG is not intended for use with any other product.
