

BENEFITS:

STRESS RESISTANCE

COLOR

ENZYMATIC FUNCTIONS

Phlex-Man is a liquid foliar product designed for use on turf where tests have confirmed a lower than desirable concentration of manganese. Foliar applications will provide immediately available manganese to the plant, especially when applied with our *PowerPlay*® products.

Manganese, which is typically low in golf course soils, is critical to stress tolerance. Manganese plays a central role in several reactions required for synthesis of phenolic compounds used for defense mechanisms.

NUTRIENT ANALYSIS

Manganese (Mn).....5.00%
Derived from manganese sulfate sequestered with citric acid.

Net Weight: 9.57 lb/gal (1.147 kg/L)

Manganese

Mn

At. Wt. 54.938

PROFESSIONAL USE GUIDELINES ③

APPLICATION:

Apply with any equipment that delivers a fine even spray mist to the target area utilizing 02-04 tips for a total spray volume of 20-40 gpa (200-350 L/ha). Do not water in. Wait at least 2 hours to irrigate.

RATE OF APPLICATION:

Apply 0.75-1.50 fl oz / 1000 sq ft (2.5-5.0 L/ha) every 4-6 weeks.

COMPATIBILITY:

Phlex-Man is tank mix compatible with many systemic fungicides, insecticides, and nutrient solutions. Jar test when in doubt. For best mixing results, remove tank strainer prior to product addition.
